

# LASER PACK

---

Laser Pack is a packaged laser cutting and laser engraving business on offer from iCompany that also includes many of the supports and benefits of a franchise but without the ongoing franchise fees.

This packaged business opportunity is ideal for those who would like to work for themselves but not necessarily by themselves. It is a ready to go business that includes all essential elements to get you started and increase your chances of success.

We are especially proud to partner exclusively with Epilog Laser, a leader in laser technology, and have what we consider to be the most versatile, user friendly, reliable and affordable laser equipment for small businesses and crafts people.

The best way to describe how Epilog lasers work is to compare the system to your printer. Using similar technology, we take the images you typically print to paper, but instead of paper you're actually firing a laser beam that engraves and cuts into a wide variety of material limiting you to just your imagination:

Engraving Materials: Wood, acrylic, plastic, glass, leather, corian, fabric, coated metals, anodized aluminium, ceramics, mylar, pressboard and more.

Cutting Materials: Wood, acrylic, plastic, delrin, cloth, leather, melamine, paper, rubber, veneer, cork and more.
